

## Grind Eze 16

Dyna-Plex 21C® Grind-Eze 16 is a clear, 15 cSt specialty oil for high-speed grinding of ferrous metals. The fluid is chlorine free and possesses excellent cooling, lubricity, and extreme pressure characteristics. It is manufactured from severely hydrotreated base oils with low aromatic content. Grind-Eze 16 exhibits excellent oxidation resistance and has a high natural VI. The anti-mist package reduces smoke and mist and improves the working environment. Grind Eze 16 is formulated with highly effective defoamant additives to minimize foaming in high velocity grinding applications.

Dyna-Plex 21C Grind-Eze 16 is intended for high-speed grinding of ferrous metals to include high nickel and chrome alloys. It is particularly effective in gear grinding, thread grinding, and flute grinding applications. The combination of high-quality base oils with superior additive technology promotes optimal protection and flushing of the grinding wheels.
