

Draw-Eze Series Oils

Dyna-Plex 21C® Draw-Eze Series Oils are heavy-duty products intended for difficult drawing and fine blanking operations on ferrous metals. These oils are formulated with robust extreme pressure additives and provide excellent boundary lubrication, extending tool and die life.

Draw-Eze 251-E-50-F is a 65 cSt, chlorinated, clear-amber oil intended for difficult blanking and drawing operations on ferrous metals.

Draw-Eze 571 is a 68 cSt, active-sulfur, clear-amber oil formulated for heavy-duty blanking and drawing of ferrous metals. This product does not contain chlorine.

Both oils are used as received and can be removed from parts with alkaline cleaners or solvents.
